

Peer-2-Professional Guidance App

12 Modules - Code Location Report

This document maps the twelve functional modules of the Peer-2-Professional (P2P) Guidance Platform to their implementation locations in the Django codebase. Primary application code resides in the `home/` app; project configuration is in `p2p/`; UI templates are in `templates/`.

Module Summary

#	Module	Primary Purpose	Status
1	Auth & Profile	OTP, OAuth, profiles	Implemented
2	Matching System	Skills, connections, discover	Implemented
3	Session Booking	Create, book, schedule	Implemented
4	Chat & Messaging	WebSocket + AJAX chat	Implemented
5	Google Meet Links	Calendar / Daily.co links	Implemented
6	Feedback & Rating	Star reviews	Implemented
7	Notifications	In-app + WebSocket alerts	Implemented
8	Admin Dashboard	Custom Django admin	Implemented
9	Knowledge Hub	Resources, blog, forum	Implemented
10	Help & Support	FAQ + tickets	Implemented
11	Payment Module	Screenshot verification	Implemented
12	AI Assistant	Groq smart assistant	Implemented

Cross-Cutting Infrastructure

- `home/urls.py` - All user-facing routes (namespace: `home`)
- `p2p/urls.py` - Root routing: admin, home app, Google OAuth
- `p2p/settings.py` - Auth, email, channels, OTP, Daily.co, Groq API keys
- `p2p/asgi.py` - HTTP + WebSocket ASGI application
- `home/apps.py` - Loads signals on application startup
- `templates/base.html` - Shared layout, navigation, notification WebSocket
- `templates/404.html`, `500.html` - Custom error pages

Peer-2-Professional Guidance App

12 Modules - Code Location Report

1. User Authentication & Profile Management

Purpose

Handles email/password signup with OTP verification, Google OAuth login, onboarding, profile editing, mentor payment account setup, and presence status.

Models

- CustomUser
- EmailOTP
- PendingSignup (home/models.py)

Views

- signup_start, verify_email, resend_otp, login_view, logout_view
- google_profile_confirm, onboarding_setup, profile_view
- edit_profile, edit_payment_details, update_presence (home/views.py)

URLs

- /signup/, /verify-email/, /login/, /logout/, /onboarding/
- /profile/, /profile/edit/, /profile/edit-payment/
- Google OAuth: /auth/ (p2p/urls.py)

Templates

- signup.html, verify_email.html, login.html
- google_profile_confirm.html, onboarding_setup.html
- profile.html, edit_profile.html, edit_payment_details.html

Other Key Files

- Forms: home/forms.py (EmailSignupStartForm, LoginForm, etc.)
- Social pipeline: home/social_pipeline.py
- Admin: CustomUserAdmin, EmailOTPAdmin (home/admin.py)
- Settings: AUTH_USER_MODEL, SOCIAL_AUTH_*, EMAIL_*, OTP_* (p2p/settings.py)

Peer-2-Professional Guidance App

12 Modules - Code Location Report

2. Mentor-Mentee Matching System

Purpose

Skill-based session and mentor recommendations, people discovery with search/filter, connection requests, and public profile pages.

Models

- CustomUser (skills, availability)
- ConnectionRequest
- Session tags (home/models.py)

Views

- browse_sessions, send_connect_request, manage_connect_requests
- disconnect_user, public_profile (home/views.py)
- Helpers: _get_platform_users, _get_connection_user_ids, _filter_sessions

URLs

- /sessions/browse/, /connect/<id>/, /requests/
- /connect/disconnect/<id>/, /u/<username>/

Templates

- browse_sessions_v2.html, connect_requests_v2.html, public_profile.html
- includes/user_card.html, people_search_form.html, session_card.html

Other Key Files

- Seed command: home/management/commands/seed_sessions.py

Peer-2-Professional Guidance App

12 Modules - Code Location Report

3. Session Booking & Scheduling

Purpose

Mentees post session requests; mentors post open sessions. Supports browse, book, edit, delete, reschedule, join, and complete. Pricing: Rs. 500 per 15 minutes.

Models

- Session (home/models.py)

Views

- create_session, browse_sessions, book_session, update_session
- delete_session, join_session_meeting, complete_session, reschedule_session, index

URLs

- /sessions/create/, /sessions/browse/, /sessions/book/<id>/
- /sessions/<id>/edit/, /sessions/join/<id>/, /sessions/reschedule/<id>/

Templates

- index.html, session_form_v2.html, browse_sessions_v2.html, includes/session_card.html

Other Key Files

- Forms: SessionForm (home/forms.py)
- Signals: session_status_notification (home/signals.py)
- Commands: send_session_reminders.py, seed_sessions.py
- Admin: SessionAdmin (home/admin.py)

Peer-2-Professional Guidance App

12 Modules - Code Location Report

4. Chat & Messaging Module

Purpose

One-to-one direct messaging with inbox, chat rooms, AJAX send/fetch, WebSocket real-time delivery, and message edit/delete.

Models

- DirectMessage (home/models.py)

Views

- chat_inbox, chat_room, send_message_ajax, fetch_messages_ajax
- delete_chat_thread, delete_message, edit_message (home/views.py)

URLs

- /chat/, /chat/<user_id>/, /chat/send-ajax/, /chat/fetch-ajax/<user_id>/

Templates

- chat.html

Other Key Files

- WebSocket: home/consumers.py (ChatConsumer)
- Routing: home/routing.py (ws/chat/<user_id>/)
- ASGI: p2p/asgi.py | Settings: CHANNEL_LAYERS, daphne, channels

Peer-2-Professional Guidance App

12 Modules - Code Location Report

5. Meeting Link Integration (Google Meet)

Purpose

Generates meeting links after payment approval. Priority: personal link, Google Calendar Meet API, then Daily.co fallback.

Models

- Session.meeting_link, CustomUser.personal_meeting_link
- CustomUser.is_calendar_connected (home/models.py)

Views

- verify_payment, join_session_meeting, reschedule_session (home/views.py)

URLs

- /sessions/<id>/verify/, /sessions/join/<id>/, /sessions/reschedule/<id>/

Templates

- verify_payment.html, session cards in index.html

Other Key Files

- Services: home/services.py (generate_meeting_link, generate_google_meet_link)
- Social: update_calendar_status (home/social_pipeline.py)
- Settings: SOCIAL_AUTH_GOOGLE_OAUTH2_SCOPE, DAILY_API_KEY

Peer-2-Professional Guidance App

12 Modules - Code Location Report

6. Feedback & Rating System

Purpose

Mentees submit 1-5 star reviews with comments after sessions. Average ratings displayed on public profiles.

Models

- Review (home/models.py)
- CustomUser.average_rating property

Views

- leave_review, public_profile (home/views.py)

URLs

- /sessions/<id>/review/, /u/<username>/

Templates

- leave_review.html, public_profile.html

Other Key Files

- Notifications created on 5-star reviews in leave_review view

Peer-2-Professional Guidance App

12 Modules - Code Location Report

7. Notification System

Purpose

In-app notifications for bookings, payments, messages, connections, reviews, and session reminders. Real-time push via WebSocket.

Models

- Notification (home/models.py)

Views

- notifications_view, mark_notification_read
- mark_all_notifications_read, delete_all_notifications

URLs

- /notifications/, /notifications/read-all/, /notifications/read/<id>/

Templates

- notifications.html, notification bell in base.html

Other Key Files

- WebSocket: NotificationConsumer (home/consumers.py, ws/notifications/)
- Signals: notification_broadcast (home/signals.py)
- Command: send_session_reminders.py | Admin: NotificationAdmin

Peer-2-Professional Guidance App

12 Modules - Code Location Report

8. Admin Dashboard

Purpose

Custom Django admin site with dashboard statistics and CRUD for core platform entities.

Models

- Managed: CustomUser, Session, EmailOTP, PendingSignup
- Notification, FAQ, SupportTicket, TicketMessage

Views

- CustomAdminSite in home/admin.py

URLs

- /admin/ (p2p/urls.py)

Templates

- templates/admin/index.html, templates/admin/base_site.html

Other Key Files

- Admin site name: p2p_admin | Custom stats on admin index page

Peer-2-Professional Guidance App

12 Modules - Code Location Report

9. Knowledge Hub (Resources, Blog, Forum)

Purpose

Educational hub with categorized resources, blog posts, and community forum threads.

Models

- HubCategory, Resource, BlogPost, ForumThread, ForumComment (home/models.py)

Views

- knowledge_hub_dashboard, resource_list, upload_resource, delete_resource
- blog_list, create_blog, blog_detail, delete_blog
- forum_list, create_forum_thread, forum_thread_detail, delete_forum_thread

URLs

- /hub/, /hub/resources/, /hub/blogs/, /hub/forum/ and sub-routes

Templates

- templates/knowledge_hub/*.html (dashboard, blog, forum, resource)

Other Key Files

- Forms: ResourceForm, BlogPostForm, ForumThreadForm (home/forms.py)
- Seed: home/management/commands/seed_blogs.py

Peer-2-Professional Guidance App

12 Modules - Code Location Report

10. Help & Support Center

Purpose

FAQ browsing with search, support ticket creation with attachments, threaded replies, and ticket close workflow.

Models

- FAQ, SupportTicket, TicketMessage (home/models.py)

Views

- support_home, create_ticket, ticket_detail, close_ticket (home/views.py)

URLs

- /support/, /support/ticket/new/, /support/ticket/<id>/

Templates

- support/home.html, ticket_form.html, ticket_detail.html

Other Key Files

- Forms: SupportTicketForm, TicketMessageForm (home/forms.py)
- Admin: FAQAdmin, SupportTicketAdmin (home/admin.py)

Peer-2-Professional Guidance App

12 Modules - Code Location Report

11. Payment Module

Purpose

Mentee uploads payment screenshot; mentor verifies or rejects. On approval, meeting link is generated and both parties are notified.

Models

- Session.payment_status, payment_screenshot, total_price
- CustomUser payment bank fields (home/models.py)

Views

- submit_payment, verify_payment, edit_payment_details, book_session

URLs

- /sessions/<id>/payment/, /sessions/<id>/verify/, /profile/edit-payment/

Templates

- submit_payment.html, verify_payment.html, edit_payment_details.html

Other Key Files

- Forms: PaymentDetailsForm (home/forms.py)
- Services: generate_meeting_link called from verify_payment

Peer-2-Professional Guidance App

12 Modules - Code Location Report

12. AI Agent Smart Assistant Module

Purpose

Groq-powered in-app assistant with platform-aware system prompt. Falls back to rule-based mentor matching if API is unavailable.

Models

- Uses CustomUser and Session data for context (read-only)

Views

- ai_assistant_home, ai_assistant_chat_ajax (home/views.py)

URLs

- /support/assistant/, /support/assistant/chat-ajax/

Templates

- support/ai_assistant.html

Other Key Files

- Settings: GROQ_API_KEY (p2p/settings.py)
- API: Groq llama-3.3-70b-versatile via api.groq.com
